One organised place for your projects. Another safe copy protecting them.

This is where MACK's drawings, models, renders and client files will live, how the team works on them, and how they stay safe. Everything is owned by MACK, priced in rupees, and needs no server in the studio.

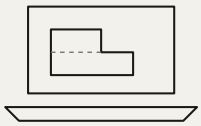

01

STORE

Every project lives in one company account, organised the same way, owned by MACK, not by any one person.

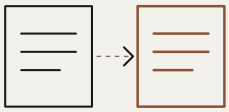

02

WORK

The team opens files from a drive on their laptop, in the studio, at home or on site, as if the files were on the computer.

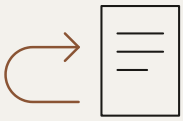

03

BACK UP

A separate company copies everything three times a day, automatically. Finished projects are also kept on drives MACK holds.

04

RECOVER

A deleted, overwritten or lost file can be brought back, from minutes ago or from years ago.

THE RECOMMENDATION

Google Workspace for the team, an independent online backup, and two backup drives for finished work.

ONCE

₹38,410

Two encrypted backup drives. No server needed.

EVERY MONTH

₹7,326

Cloud storage, company email and backup for 5 people.

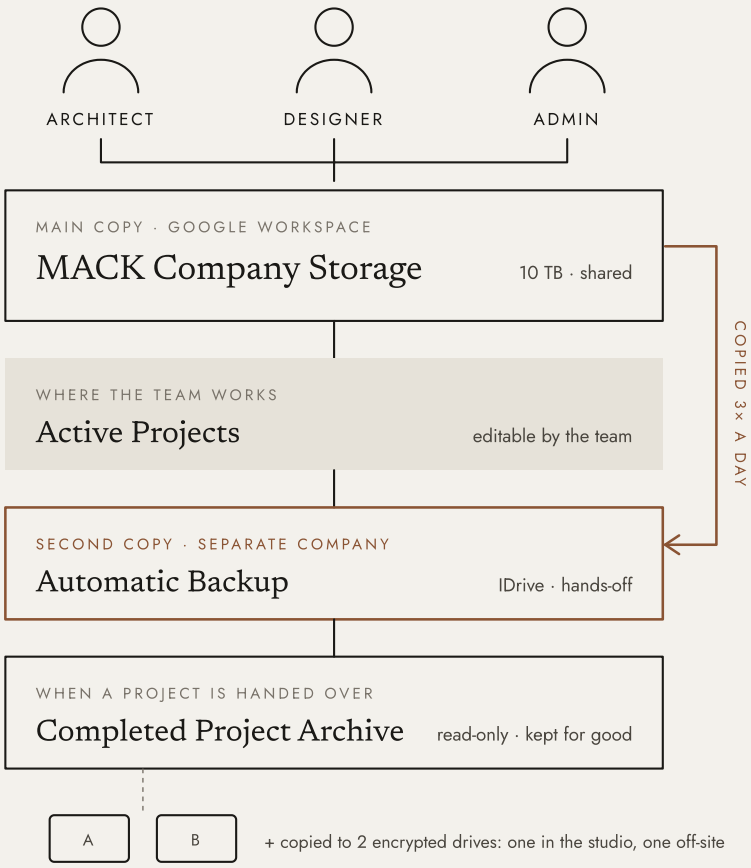

FIRST YEAR, ALL IN

₹1,26,320

Then ₹87,910 a year. Includes 18% GST.

02

Where the files go, and who can open them.

EVERY PROJECT, THE SAME FOLDERS

MACK PROJECTS / RESIDENTIAL

2026-014 Garden House

01	Client Documents	brief, contract
02	Site	survey, photos, video
03	CAD	DWG drawings
04	3D	Revit, SketchUp
05	Renders	final images
06	Presentations	client decks
07	Final Deliverables	shared with client

DWG · REVIT · SKETCHUP · RENDERS · PHOTOS · PDFS · CLIENT FILES

Files are never kept only on a laptop or desktop. Laptops show and cache them; the company account holds them.

WHO CAN OPEN WHAT

	ACTIVE PROJECTS	LIBRARY (BLOCKS, TEMPLATES)	ARCHIVE	OFFICE (CONTRACTS, FINANCE)
Principals	● Edit	● Edit	● Edit	● Edit
Architects & designers	● Edit	● Edit	○ View	—
Office admin	● Edit	● Edit	○ View	● Edit
Clients & consultants	● Only the folder we share with them, by name, for a set time. Usually *07 Final Deliverables*.			

03

Cloud storage keeps files available. A backup keeps them recoverable.

MAIN WORKING FILES

Google Workspace · what the team uses every day

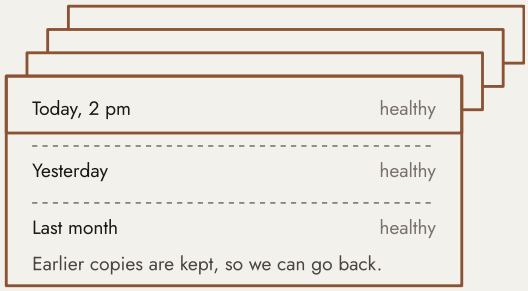

A change here reaches every laptop at once, including a mistake or a virus.

COPIED 3× A DAY

one way only

INDEPENDENT BACKUP

IDrive · a separate company, separate password

Accidental deletion

A project folder is deleted by mistake.

HOW WE RECOVER

Restore it from the Bin within 30 days, or from the backup after that.

MINUTES

Laptop lost or stolen

Nothing was stored only on that laptop.

HOW WE RECOVER

We switch off its access remotely. The person signs in on another laptop and carries on.

ABOUT AN HOUR

File overwritten

Someone saves over the latest drawing.

HOW WE RECOVER

Open an earlier version from the last 30 days, or an older one from the backup.

MINUTES

Hardware or ransomware

A virus scrambles files, a computer fails, or an account is misused.

HOW WE RECOVER

Syncing pauses automatically. We roll files back to a clean copy from before the problem.

HOURS

The studio itself can be lost too, through theft or fire. Nothing important is kept only there: the main copy and the backup are online, and one of the two drives with finished projects is kept off-site.

04

Three ways to do it. One we recommend.

A

ESSENTIAL

Company cloud storage and email, plus an automatic online backup at a separate company.

STORAGE
10 TB online, shared by the team

BACKUP
Online, 3 times a day

UPFRONT
₹0

RECURRING
₹7,326
a month · ₹87,910 a year

MACK holds no copy of its own. Priced for 5 people.

OUR RECOMMENDATION

B

RECOMMENDED

Everything in Essential, plus two encrypted drives holding every finished project. One stays in the studio, one off-site.

STORAGE
10 TB online + 5 TB on the drives

BACKUP
Online 3 times a day, plus offline drives

UPFRONT
₹38,410

RECURRING
₹7,326
a month · ₹87,910 a year

The best protection for each rupee spent. Priced for 5 people.

C

GROWTH

For a larger studio: adds a storage server in the studio for fast shared work on big models, with its own backup.

STORAGE
20 TB online + 24 TB in the studio

BACKUP
Online, plus a studio copy, plus offline drives

UPFRONT
₹2,97,650

RECURRING
₹18,629
a month · ₹2,23,550 a year

For when MACK grows past about 10 people. Priced for 10 people.

WHY B

For ₹38,410 once, MACK keeps a copy of every finished project that does not depend on any subscription, password or internet connection. The monthly cost is the same as Essential.

All prices include 18% GST. Researched 18 October 2026.

05

The MACK system, and exactly what it costs.

LAYER	WHAT IT DOES	CAPACITY	COST
MACK team 5 people, their laptops	Work from the MACK drive on their laptops, in the studio or on site.	—	**existing laptops**
MAIN CLOUD Google Workspace	**Where every project lives** Also MACK's company email, calendar and video calls. Business Standard plan.	10 TB, shared	**₹76,464 / year**
INDEPENDENT BACKUP IDrive Backup	**An independent safety copy** Copies everything 3× a day to a separate company, with earlier versions kept.	10 TB per person	**₹11,446 / year**
ARCHIVE Archive + Vault drives	**Finished projects, kept for good** Read-only online, plus copied to two encrypted drives MACK holds.	2 × 5 TB drives	**₹38,410 once**

ONE-TIME

Hardware (server / NAS)	₹0
Drives 2 × 5 TB at ₹19,205	₹38,410
Other	₹0
Initial investment	**₹38,410**

RECURRING

Cloud Google Workspace, 5 people	₹76,464 / yr
Backup IDrive, 5 people	₹11,446 / yr
Other	₹0
Running cost = ₹7,326 a month	**₹87,910 / yr**

YEAR 1 ₹1,26,320

YEAR 2 ONWARDS ₹87,910 / year

NOT BUYING YET

A storage server (NAS), Microsoft 365, Dropbox, or separate archive storage. None of these is needed at MACK's current size. We will revisit them at the points listed on the next page.

Prices include 18% GST, researched 18 October 2026; dollar services at $1 = ₹97. If MACK is GST-registered, much of the GST can be claimed back. Not included: internet connection, laptops, set-up time.

06

What happens next. About three weeks.

1

SET UP ACCOUNTS

Company Google Workspace and an email address for each person.

2

ORGANISE PROJECTS

One folder structure for every project, the same for everyone.

3

MOVE FILES

Existing projects copied in and checked. Old copies kept for 60 days.

4

SET PERMISSIONS

Team, principals, office, clients: each sees only what they need.

5

SWITCH ON BACKUP

The independent backup starts. The two drives are filled with finished work.

6

SECURE

Two-step sign-in for everyone. A lost laptop can be locked out remotely.

7

TEST RECOVERY

We delete, overwrite and "lose" files on purpose, then bring them back.

8

GO LIVE

A 30-minute walkthrough for the team, then everyone works from the MACK drive.

WHAT CHANGES FOR THE TEAM

- Save to the MACK drive, never only to the desktop.
- Send clients a shared folder, not attachments or WhatsApp.
- One person edits a drawing at a time.
- Mistakes can be undone, so ask for help rather than redo work.

WE REVISIT THE PLAN WHEN

- MACK grows past about 10 people.
- Online storage is three-quarters full.
- Several people need to work on the same model at once.
- The studio internet becomes unreliable.

MACK owns the accounts, data and infrastructure.

Every account is registered to MACK and paid by MACK. Our implementation partner has administrator access only to set up and look after the system, and that access can be removed at any time.
